Subject: Re: Question

The application of Methyl Bromide was conducted on Wednesday, 18 March, 2015. Time - around midday. Unofficially: One person believes it was started around 11 AM, another source remembered it closer to 12:30 or 1:00 PM. Again this is unofficial.

As to the check in time for the family arriving to Sirinusa, I had one source tell me they arrived Saturday, March 14, Again unofficial since we did not speak to the family directly.

If you need exact times we can obtain such.

Geoff
